

# Get your tree home safely

*Be gentle, trees are flexible, but handle with care.*

## Lift by the bucket

- Lift and carry your tree by the bucket.
- Do not carry by the trunk.

## Protect the branches

- If transporting in a car, tree should be completely inside the vehicle.
- If transporting in a truck, lay tree down flat with the root ball facing towards the cab and the branches towards the tailgate.
- If your tree does not fit inside, cover the branches with a sheet or a tarp.

## Plant as soon as possible

- Take your tree out of the car as soon as possible to avoid drying out.
- Plant within two weeks of pick-up.
- Keep soil moist until you plant your tree.
